

SOLIDair

Single phase oil free piston compressors

- Low maintenance piston mechanism with fine ribbed aluminium cylinders
- Piston sealing strips made from high-grade teflon
- Big-end bearings for smooth wear-free running
- Air receivers lined with epoxy resin

INCLUDING:

- High quality pressure switch
- Quality pressure reducer
- Two pressure gauges
- Low sound level, low vibration
- Single tube adsorption* dryer with a dew point approx -20. Includes pre-cooler with filter water separator

Model 250AT-TS, 2.4hp, 1.8kW, 188L/min, 6.6cfm, 57dB(A) on 50ltr tank

Model 500AT-T, 2x2.4hp, 2x1.8kW, 2x188L/min, 13.2cfm, 68dB(A) on 100ltr tank

* adsorption dryer for high quality dry compressed air. The air temp is lowered in the pre-cooler and condensate is discharged through the filter water separator. The air then passes through a stainless steel tube filled with hygroscopic granules which regenerate for continuous use
